

Experimental Amateur Built Aircraft 101

We see homebuilt airplanes every time we fly. What are they? How are they built? How much do they cost? Can I build one? Do I need special skills? Do I need help? Where do I get help? How long does it take? Are they safe? Can I get insurance? Do they need an annual? Where can I fly them? Which one is best? How do I define best? Where do I build one? Are there test flights? Who does the test flight? Does the FAA look them over? How many are out there?

Directions: This seminar will be located in the Modern Avionics Hanger.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafetyTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
